

A comprehensive salon safety knowledge base should outline protocols for **sanitization**, **chemical handling**, and **client well-being**. Sharing these guidelines builds customer trust and ensures a clean, hazard-free environment.

1. Hygiene & Sanitation Protocols

- **Tool Disinfection:** All metal tools (e.g., scissors, combs, clippers, tweezers) must be cleaned with soap and then submerged in an EPA-registered hospital-grade disinfectant between every client.
- **Single-Use Items:** Single-use items like neck strips, sponges, and waxing spatulas must be discarded immediately after a single use.
- **Clean Linens:** Capes and towels must be laundered in hot water and detergent after each client.
- **Hand Hygiene:** Stylists and technicians must wash their hands or use hand sanitizer before and after every appointment.
- **Workstation Wipe-downs:** All high-touch surfaces, including hydraulic chairs, mirrors, and countertops, must be disinfected between appointments.

2. Chemical Safety & Allergy Prevention

- **Product Safety:** Staff should follow strict chemical handling rules. Always read product labels, store flammable materials properly, and use adequate ventilation to prevent inhalation of fumes.
- **Patch Tests:** Perform patch tests 24–48 hours before applying hair color or chemical treatments to ensure clients do not suffer allergic reactions.
- **Personal Protective Equipment (PPE):** Staff must wear appropriate PPE—such as disposable nitrile/vinyl gloves and aprons—when mixing or applying chemical solutions.
- **First Aid:** Keep a well-stocked first-aid kit on-site and train all staff on how to quickly handle product exposure or skin irritations.

3. Client Guidelines & Etiquette

- **Appointments Only:** Encourage clients to pre-book appointments to prevent overcrowding and maintain proper social distancing in the waiting area.
- **Health Screening:** Request that clients reschedule their appointments if they are feeling unwell, running a fever, or experiencing contagious symptoms.
- **Belongings & Payments:** Encourage clients to minimize the personal items they bring into the salon and to opt for digital, contactless payments.
- **Client Handwashing:** Provide a clear hand-sanitizer station at the entrance and politely instruct clients to sanitize or wash their hands upon arrival.

4. Hazard Prevention

- **Slips and Trips:** Keep walkways completely clear of debris, electrical cords, and product packaging to prevent falls. Promptly clean up any wet floors or product spills.
- **Electrical Equipment:** Ensure hairdryers, straighteners, and clippers are well-maintained, stored safely when not in use, and regularly inspected for damaged cords.
